## SUMMARY

---

IT and operations professional with 10+ years of experience across enterprise endpoint support, asset lifecycle management, and operational leadership. Currently delivering infrastructure and systems support at CyberArk, A Palo Alto Networks Company, through Beacon Hill Staffing. Proven ability to design ServiceNow dashboards, build automation tools, and create structured workflows that drive operational visibility and throughput, most recently redesigning an enterprise off-boarding workflow that doubled monthly ticket capacity while the team itself shrank by three. Completing a BS in Information Technology (GPA: 3.86).

## PROFESSIONAL EXPERIENCE

---

### IT Systems Support Specialist | Beacon Hill Staffing - Placed at CyberArk, A Palo Alto Networks Company

January 2026 - Present • Needham, MA • On-site • Contract

#### Endpoint Administration & Asset Lifecycle Management:

- Delivered Tier 2 endpoint and systems support across the Americas region for a global cybersecurity enterprise, coordinating escalations with global service teams, the local help desk, and US IT.
- Executed secure disposal of 91 devices (72 MacBook Pro T2; 19 Dell Latitude 5730 and Precision 7730), reconciling every asset record in ServiceNow and deprovisioning each unit from Jamf and Intune, restoring lifecycle accuracy across both Apple and Dell platforms.
- Authored the cross-platform secure erasure SOP covering Blancco on T2 through M5 Apple silicon and Dell hardware, with documented fallback paths (Apple Configurator firmware restore, DoD-standard terminal SecureErase, and drive removal for non-booting units), making disposal audit-ready and executable by any technician.
- Redesigned the enterprise off-boarding workflow, lifting monthly ticket capacity from a prior high of 117 to 217 and then 247 during acquisition-driven peak volume, a 111% increase achieved after the team lost three technicians, with a fourth out for the entire peak month.

#### Process Design & Systems Automation:

- Built the Asset Lifecycle Management Dashboard in ServiceNow, a multi-tab view spanning off-boarding, recovery, reimaging, return-to-inventory, and disposal. Extended it with retirement-by-model tracking and technician-attributed disposal reporting. The consolidated view gave IT end-to-end lifecycle visibility where none previously existed.
- Designed and implemented a 9-color physical inventory system using color-coded dry erase board magnets mapped to asset lifecycle stages in ServiceNow, enabling immediate visual triage without system access.
- Rebuilt the intake pipeline for off-boarded and refreshed laptops, replacing reactive just-in-time imaging with a full image-and-rebuild process driven by a PowerShell script that detects device model, installs correct drivers, and runs Dell Command Update unattended during OOBE, creating an audit trail for returns where none existed and leaving roughly 100 endpoints deploy-ready on demand.
- Migrated approximately 120 endpoints from the CyberArk image to the Palo Alto Networks standard image following the acquisition, delivering hands-on endpoint integration during a corporate merger.

### IT Client Support Specialist | Northeastern University

April 2022 - December 2025

#### Technical Performance & Service Excellence:

- Delivered advanced Tier II and III endpoint support across Windows and macOS environments using Jamf, Intune, Azure AD, and ServiceNow, processing 2,000+ tickets at 31% above team average volume.
- Handled 42 high-priority tickets (180% above team average), serving as a de facto crisis management resource for business-critical incidents.

#### Operational Innovation & Leadership:

- Designed and deployed 4 operational dashboards in ServiceNow to improve team workflow visibility, accountability, and management reporting.
- Led knowledge base authoring and junior staff training initiatives; served as lead contributor to the campus locker loaner program and portable charging initiative.
- Progressed from Service Desk Analyst to IT Client Support Specialist; consistently rated Exceeds Expectations in annual performance reviews.

### Operations Manager | Elite Delivery Services

March 2017 - April 2022

#### Strategic Operations & Performance Management:

- Managed daily operations for a 30-driver regional fleet, improving on-time delivery rate by 18% through data-driven route optimization and strategic planning.
- Reduced operational costs by 12% through implementation of analytical routing strategies and resource allocation improvements.

- Decreased employee turnover by 25% through strategic workforce development, performance management, and engagement initiatives.

#### Customer & Stakeholder Relationship Management:

- Resolved complex delivery escalations and client conflicts, increasing customer satisfaction scores by 20%.
- Built strategic partnerships with clients and vendors, ensuring alignment between service capabilities and business requirements.
- Built onboarding documentation, SOPs, and performance management structures from the ground up, stabilizing workflow in a high-variability operational environment.

#### Assistant Engineer | Q Division Studios

September 2013 - December 2017 · Somerville, MA · Freelance

#### Project Coordination & Technical Leadership:

- Supported high-profile studio sessions, coordinating with producers, artists, and lead engineers to ensure seamless execution; managed session prep, patchbay configuration, outboard gear setup, and real-time troubleshooting under pressure.
- Acted as technical lead for incoming interns, guiding session setup, maintaining gear standards, and mentoring peers in a fast-paced, high-expectation environment.

## EDUCATION

---

**Bachelor of Science in Information Technology (In Progress) · GPA: 3.86**

**Northeastern University · 2022 - Present**

**Associate Degree in General Business**

**Bay State College · 2001 - 2003**

## PROFESSIONAL DEVELOPMENT & CERTIFICATIONS

---

#### Leadership & Management:

- Essentials of Management · Tandem Solutions, LLC · July 2025
- Business Analysis & Process Management · Coursera Project Network · March 2025
- Leadership & Customer Experience: four-course series covering team leadership, leadership effectiveness, customer experience, and service team management · LinkedIn Learning · December 2024

#### Project Management & Process Improvement:

- Google Project Management Professional Certificate (6-Course Series)
- Process Improvement Foundations · LinkedIn Learning · February 2025
- Requirements Elicitation and Analysis · LinkedIn Learning · February 2025

#### IT, Systems & AI Automation:

- Microsoft Azure Fundamentals (AZ-900) · Certification Preparation
- Intro to Service Management with ITIL 4 · LinkedIn Learning · May 2025
- ServiceNow: Basic Administration · LinkedIn Learning · November 2024
- AI Automation with Anthropic Claude API's Agentic Computer Use · LinkedIn Learning · May 2025
- Intelligent Automation Foundations · LinkedIn Learning · May 2025

## TECHNICAL PROFICIENCIES

---

**Systems & Platforms:** Active Directory, Azure, Intune, Jamf, DUO Admin, Adobe Admin, Papercut Admin

**Service Management:** ServiceNow, Microsoft Project, Asana

**Operating Systems:** Windows, macOS

**Support & Automation Tools:** PowerShell, Bomgar Remote Support, Blancco, Miro, Global Protect VPN

**Programming:** HTML, CSS, SQL, Python (Foundations)

**Project Management:** Predictive & Agile Methodologies, Workflow Optimization, Process Automation
